## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on 17 December 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 6-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Langley (US 5,560,974). Langley discloses a breathable nonwoven composite barrier fabric (abstract).

This composite fabric can be used in the field of protective garments (col 1, ln 16-17). The composite barrier fabric is made up of a top and a bottom layer (col 5, ln 51-55), which the Examiner is equating to the facings of the present invention. The layers are secured to one another by adhesive bonding that can be applied in non-continuous patterns (col 5, ln 55-60). An adhesive scrim can be used to adhesively laminate two nonwoven fabrics together (col 8, ln 35-43). The polymer of the scrims can be polyethylene and polypropylene (col 8, ln 53-56).

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1771

4. Claims 5 and 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Langley (US 5,560,974), as shown above, in view of Heindel et al. (US 5,316,836). Langley discloses the claimed invention except for the teaching that the pattern is a semi-cycloidal pattern.

Heindel et al. disclose an absorbent article wherein the adhesive is applied in a semi-cycloidal pattern (col 3, ln 50-51 and 60-61). Adjacent semi-cycloidal patterns may overlap each other (col 17, ln 10-12). It would have been obvious to one having ordinary skill in the art at the time the invention was made to have used Heindel's semi-cycloidal adhesive pattern as the discontinuous adhesive pattern of Langley, motivated by the desire to create a composite having good bond integrity.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure: Austin et al. (US 5,415,925) is pertinent because it discloses an adhesive bonding plies of nonwoven layers together, but fails to disclose that the adhesive is a scrim.
